

Limitless design possibilities

Green wall structures create unique designs even before schemes are fully planted. The combination of steel rod, rope and Webnet provide elegant design options, giving additional texture to facades and providing strong shadow definition.

The Jakob product range is backed by a full technical support package. Assisting architects, developers and contractors in selecting the best system to meet their aesthetic and performance needs. We also supply a complete design, supply, fit and maintenance service.

For world wide distribution please visit jakob.com.
