

The Benefits of Overhangs and Shading Devices

TOPICS: Overhang, Shade

WRITTEN BY: ROY MORA | 03/01/2021

Shading devices added to the exterior of a building can serve the dual role of saving energy by reducing solar heat gain through the building envelope and creating elements of visual interest. These features help to define the building's design as a welcoming and sustainable space, contributing to the property's total value.
