[Green Mark Certification Scheme](#)

The Green Mark certification scheme was launched in January 2005. It is a green building rating system that promotes sustainable design and construction practices. It provides a comprehensive framework for assessing the overall environmental performance of new and existing buildings. The scheme also provides a platform for showcasing sustainable design and construction practices.

### Why apply for Green Mark certification

Green projects may enjoy these benefits over the long run:

- Meaningful differentiation of buildings in the real estate market
- Positive effect on corporate image, branding and market value of buildings
- Reduction in energy, water and material resource usage
- Reduce potential environmental impact
- Improvement in indoor environmental quality for better health and well-being
- Provide clear direction for continual improvement

### Who can apply

Developers, building owners and government agencies for new and existing buildings, clinics, parks, infrastructure and buildings interiors.

### Key criteria

- Climate responsive design
- Building energy performance
- Resource conservation
- Smart and healthy building
- Advance green efforts

### Application and assessment process

Application	Submit an application online with relevant supporting documents to indicate your interest to obtain Green Mark certification.
