

Will Blackout Curtains Keep You Cooler This Summer?

[Find Pros](#)

Seems like just yesterday we were groaning over our high heating bills. Now with the full heat of summer about to hit, we're looking for ways to keep ourselves cooler and make our A/C use more efficient.

Hanging blackout curtains is one of the cheapest, easiest solutions imaginable. Blackout curtains are also known as "thermal drapes" for a reason. They're ideal for blocking light and heat from windows that get strong sun. And the best part is that contrary to popular belief, blackout curtains do not have to be black. They don't even have to be curtains!
